SHARATH

Kasargod, Kerala, IN | +91-8137055683 | sharathjogi04@gmail.com | linkedin.com/in/sharath-247a3a217

PROFESSIONAL SUMMARY

iOS developer building offline-first enterprise apps for iPhone and iPad with Swift, SwiftUI and UIKit. Experienced in scanning workflows (QR, barcode, NFC, ARKit), embedded local servers with SQLite and background sync, Network Extension tunnels, and App Store release. Also builds personal apps using Swift 6 concurrency, SwiftData and iOS app extensions (keyboard, widget, share sheet).

EMPLOYMENT EXPERIENCE

Associate Software Developer *Sep 2025 – Present*
Scleravdms — Full-Time

- Developed iOS applications using **Swift, SwiftUI, and UIKit**, improving performance and user experience.
- Implemented **QR/Barcode/NFC scanning (AVFoundation)**, **secure QR validation**, remote-session registration via QR, and **ARKit-based validation features** for real-time, camera-driven workflows.
- Built **offline-first architecture** with an embedded **Vapor** HTTP server, local REST APIs and SQLite storage, with background sync to the cloud when the device is back online.
- Integrated **REST APIs**, handled JSON parsing, authentication, and error management.
- Worked on the app's **VPN and peer-to-peer tunnel components (Network Extension)** used for secure remote access.
- Designed a **monotonic check-in/check-out system with an auto check-out scheduler** for accurate activity tracking.
- Used **Firebase Crashlytics, Performance and Remote Config** for monitoring and configuration; handled App Store Connect archive and upload, including resolving dSYM warnings.
- Optimized app performance using **Xcode Instruments**, reducing crashes and memory issues.
- Collaborated in **Agile teams**, ensuring timely delivery and clean, maintainable code.

INTERNSHIP EXPERIENCE

Software Intern *Feb 2025 – Jul 2025*
Pentagon Space Private Limited

- Developed a full-stack Banking Web Application (account creation, balance inquiry, fund transfer, transaction history) using Java, J2EE (Servlets & JSP), JDBC, and MySQL.
- Collaborated in a team environment, gaining hands-on experience in full-stack web development, debugging, and project lifecycle management.

PROJECTS

Sclera iOS App — Enterprise Inspection & Asset Management (iPhone/iPad)

- Built features for an offline-first enterprise iOS app (Swift, UIKit, SwiftUI) for field inspections, checklists, asset tracking and work orders.
- Worked on an embedded Vapor HTTP server serving a web front end and local REST APIs over SQLite, with background sync to the Sclera backend.
- Built a SwiftUI signature-capture feature (transparent PNG, base64 via local API) and extended checklist APIs and the offline DB to store signatures.
- Worked on QR/barcode/NFC scanning, the Network Extension VPN tunnel, 23-language localization and Firebase monitoring.

ClipVault — Clipboard History for iPhone *Personal project · in development*

- Designed and built a clipboard-history app with **four targets** — app, Share extension, custom Keyboard extension and WidgetKit widget — sharing one **SwiftData** store through an **App Group**, with **Swift 6 strict concurrency** (actor-based store).
- Moved shared logic into a local Swift package (**ClipKit**) covered by **53 automated tests**; added **App Intents** for Shortcuts, Siri and the Action button.
- Designed around iOS clipboard limits: capture only on user action (system Paste button, share sheet, Shortcuts, app/keyboard open) with no background polling; keyboard kept memory-aware (text-only, 50 rows, full text loaded on tap).
- Built privacy features: one-time codes and card numbers (Luhn check) are masked, hidden from the widget and deleted after 10 minutes; optional Face ID lock; all data stays on-device with no server or analytics.

Smart Inventory — Asset Scanning & Onboarding

- Developed an iOS asset-tracking application in Swift that scans QR codes and barcodes (AVFoundation) to instantly identify an asset and retrieve its details.
- Implemented asset onboarding: an unregistered code opens an onboarding form with the scanned code pre-filled, so a new asset is captured and saved in one flow; registered assets open a details screen to view and manage them.

TrackIn-out Auto-Scheduler

- Developed an iOS app in Swift to check in to inspections and check out, with a **monotonic flow** (a session only moves forward) and an **auto check-out scheduler** that closes the session after a set time.
- Measured elapsed time with a **monotonic clock**, so timing works offline and is unaffected by changes to the device date or time, keeping recorded durations accurate.

Bank Management System

- Built a Java + MySQL desktop application with secure account management, real-time balance tracking, fund transfers, and full transaction history via an intuitive GUI.

TECHNICAL SKILLS

iOS Development: Swift, Swift 6 concurrency, SwiftUI, UIKit, SwiftData, Core Data, ARKit, AVFoundation, WidgetKit, App Intents, App Extensions, Network Extension, LocalAuthentication, Auto Layout, Xcode

Programming Languages: Swift, Java, C

Backend & Web: Vapor, J2EE (Servlets, JSP), JDBC, RESTful APIs, JSON, HTML, CSS

Database: SQLite3, Core Data, SwiftData, MySQL

Tools & Platforms: Xcode, Instruments, Git, Postman, Firebase (Crashlytics, Performance, Remote Config), App Store Connect, CocoaPods, Swift Package Manager

Methodologies: Agile, Debugging, Code Review, Performance Profiling, Problem Solving

Soft Skills: Leadership, Communication, Collaboration, Adaptability

EDUCATION

B.E. in Computer Science *Dec 2021 – Jun 2025*
SDM Institute of Technology, Ujire
CGPA: 8.4 / 10

Pre-University (PCMC) *May 2019 – Jul 2021*
Ambika Padavi Poorva Vidyalaya, Puttur
Percentage: 78%

High School (CBSE) *May 2016 – Apr 2019*
Holy Family Convent Public School, Kasargod
Percentage: 64%

EXTRA-CURRICULAR ACTIVITIES

Indian Red Cross Society, Karnataka

- Volunteered in blood donation camps; coordinated with medical staff to ensure the safety and comfort of 100+ donors.
- Promoted awareness campaigns resulting in a 20% increase in donor turnout, demonstrating strong community engagement and leadership.
