EMPLOYMENT EXPERIENCE

Associate Software Developer *Sep 2025 – Present*
Scleravdms — Full-Time

- Developed iOS applications using **Swift, SwiftUI, and UIKit**, improving performance and user experience.
- Implemented **QR/Barcode scanning (AVFoundation)** and **ARKit-based validation features** for real-time, camera-driven workflows.
- Built **offline-first architecture** with local storage (SQLite) and background sync for reliable data handling.
- Integrated **REST APIs**, handled JSON parsing, authentication, and error management.
- Designed a **monotonic check-in/check-out system with an auto check-out scheduler** for accurate activity tracking.
- Optimized app performance using **Xcode Instruments**, reducing crashes and memory issues.
- Collaborated in **Agile teams**, ensuring timely delivery and clean, maintainable code.

INTERNSHIP EXPERIENCE

Software Intern *Feb 2025 – Jul 2025*
Pentagon Space Private Limited

- Developed a full-stack Banking Web Application (account creation, balance inquiry, fund transfer, transaction history) using Java, J2EE (Servlets & JSP), JDBC, and MySQL.
- Collaborated in a team environment, gaining hands-on experience in full-stack web development, debugging, and project lifecycle management.

PROJECTS

Sclera iOS App — Enterprise Inspection & Asset Management (iPhone/iPad)

- Built features for an offline-first enterprise iOS app (Swift, UIKit, SwiftUI) for field inspections, checklists, asset tracking and work orders.
- Worked on an embedded Vapor HTTP server serving a web front end and local REST APIs over SQLite, with background sync to the Sclera backend.
- Built a SwiftUI signature-capture feature (transparent PNG, base64 via local API) and extended checklist APIs and the offline DB to store signatures.
- Worked on QR/barcode/NFC scanning, the Network Extension VPN tunnel, 23-language localization and Firebase monitoring.

Smart Inventory Application

- Smart inventory iOS application, developed in Swift, that enables asset tracking by scanning QR codes and barcodes to instantly retrieve and manage asset details.

TrackIn-out Auto-Scheduler

- Developed an iOS application using Swift for check-in/check-out management with a monotonic flow and an auto check-out scheduler to ensure accurate and automated user activity tracking.

Bank Management System

- Built a Java + MySQL desktop application with secure account management, real-time balance tracking, fund transfers, and full transaction history via an intuitive GUI.

TECHNICAL SKILLS

iOS Development: Swift, SwiftUI, UIKit, ARKit, AVFoundation, Core Data, Auto Layout, Xcode
Programming Languages: Swift, Java, C
Backend & Web: J2EE (Servlets, JSP), JDBC, RESTful APIs, JSON, HTML, CSS
Database: SQLite3, Core Data (iOS local storage)
Tools & Platforms: Xcode, Git, Postman
Methodologies: Agile, Debugging, Code Review, Problem Solving
Soft Skills: Leadership, Communication, Collaboration, Adaptability

EDUCATION

B.E. in Computer Science *Dec 2021 – Jun 2025*
SDM Institute of Technology, Ujire
CGPA: 8.4 / 10

Pre-University (PCMC) *May 2019 – Jul 2021*
Ambika Padavi Poorva Vidyalaya, Puttur
Percentage: 78%

High School (CBSE) *May 2016 – Apr 2019*
Holy Family Convent Public School, Kasargod
Percentage: 64%

EXTRA-CURRICULAR ACTIVITIES

Indian Red Cross Society, Karnataka

- Volunteered in blood donation camps; coordinated with medical staff to ensure the safety and comfort of 100+ donors.
- Promoted awareness campaigns resulting in a 20% increase in donor turnout, demonstrating strong community engagement and leadership.
